- Dimensions: 9.2 x 11.4 x 13.4 in
- Boiler: 0.3 L
- Weight: 30.9 lb
- Voltage: 120 V / 230 V
- Wattage: 1100w - 10A@110v
- Frequency: 50 / 60 Hz
- Made in Italy

Descaling Process

- Add 2-3 Tbsp citric acid to water reservoir.
- Mix
- Pull from both the brew head and steam wand until you have pulled 1/4 tank into machine
- Turn off (best to operate cold)
- Let sit for 20 minutes
- flush remaining water
- flush again with clean water

Back-flushing

Adding a Water Intake

A float valve was added in order to never have to add water manually to the espresso machine.
