What is my API Version?

Determine version that you are running:

> kubectl get nodes -o yaml

```
nodeInfo:
  architecture: amd64
  bootID: 0c1203df-d6e8-4513-b8fe-3ecb6452548c
  containerRuntimeVersion: docker://18.9.2
  kernelVersion: 4.9.125-linuxkit
  kubeProxyVersion: v1.10.11
  kubeletVersion: v1.10.11
```

kubeletVersion will be the API version

Where to find API documentation?

See: <https://kubernetes.io/docs/reference/#api-reference>
