

# Samsung TV

## Model

46" Full HD Flat TV EH5000 Series 5

## Access Service Menu

Power Off - wait 10 seconds. Mute > 1 > 8 > 2 > Power On

### TO TRY:

Power Off - wait 10 seconds. Info > Menu > Mute > Power

## Enable CEC?

---

### Which Samsung LCD TVs Have The HDMI 1.3 Interface?

Of the LN-T series Samsung LCD TVs, those models whose last two digits are 61, 65, 66, 69, 71, or 81 (for example, LN-T4071F or LN-T466F) have the HDMI 1.3 interface.

Samsung LCD TVs with HDMI 1.3 interfaces also have HDMI-CEC (HDMI - Consumer Electronics Control). For information about CEC, click [HERE](#). For information about individual Samsung LCD TVs with HDMI 1.3 interfaces and HDMI-CEC, click [HERE](#). When the Samsung LCD TV web page appears, select the TV model you want information about by clicking the drop down list under Product Finder on the left side of the page. Though other series of Samsung LCD TVs (LN-R, LN-S, etc.) have HDMI connections, none have models with the HDMI 1.3 interface.

### Quote:

Thanks for the reply. Anynet/CEC is not standard on the EH5000 unfortunately (confirmed with Samsung) so I was hoping it might be something which could be enabled.

### Stuart

It's in the Advanced settings Menu. My UN40EH5000 is hooked up to just my main HTPC; so I have no CEC devices hooked directly up to it. I have a Samsung Blu-ray player with CEC/Anynet control hooked up to another set in the house; so I can see if enabling Anynet on the set's Advanced Menu does actually enable CEC.
