

Helm Operator

Helm Release

Each release of a chart is declared by a `HelmRelease` resource. The schema for these resources is given in the custom resource definition. They look like this:

```
apiVersion: helm.fluxcd.io/v1
kind: HelmRelease
metadata:
  name: rabbit
  namespace: default
spec:
  releaseName: rabbitmq
  targetNamespace: mq
  timeout: 300
  resetValues: false
  wait: false
  forceUpgrade: false
  chart:
    repository: https://kubernetes-charts.storage.googleapis.com/
    name: rabbitmq
    version: 3.3.6
  values:
    replicas: 1
```
