

Minicom - Connecting to your board

- Install minicom

```
> sudo apt-get install minicom
```

- Connect board to USB port
- Determine port using dmesg

```
> dmesg
```

```
[13289.017517] usb 2-1: ch341-uart converter now attached to ttyUSB0
```

- Allow regular user access to USB port
> sudo chmod 0666 /dev/ttyUSB0
- Configure minicom and save as default (df)

```
> sudo minicom -s
```

- Connect to board

```
> sudo minicom
```
