

MediaWiki/Wikipedia Cheat Sheet

- [Max Width Image](#)
- [Linking within a Page - Anchor](#)
- [References](#)

Max Width Image

Add the image to your wiki page:

```
<div class="res-img">
[[File:Whatever.JPG]]
</div>
```

Make a class for responsive images, i.e. insert the following in your [MediaWiki:Common.css](#)

```
/* To make images responsive */
.res-img img {
    max-width:100%;
    height:auto;
}
```

Linking within a Page - Anchor

Define the anchor

```
<div id="NameOfAnchorHere">optional text</div>
```

Reference the anchor

```
[[#NameOfAnchorHere| test]]
```

If the div causes a line break you may want to use:

```
<div id="NameOfAnchorHere" style="display:inline;"></div>
```
