

# Temperature Sensor with Sonoff Basic

You can add a number of different sensors to the Sonoff devices. This document will describe how to add a **DS18B20 temperature sensor**.

The DS18B20 1-Wire digital temperature sensor from Maxim IC reports degrees C with 9 to 12-bit precision, -55C to 125C (+/-0.5C). Each sensor has a unique 64-Bit Serial number etched into it - allows for a huge number of sensors to be used on one data bus.

## Wiring the DS18B20

## Configuring the Sonoff

## Sonoff Basic Module

### Sonoff98

**Module parameters**

**Module type** (Sonoff Basic)  
01 Sonoff Basic

**GPIO1** Serial Out 00 None

**GPIO3** Serial In 00 None

**GPIO4** 00 None

**GPIO14** Sensor 04 DS18x20

Save

Configuration

## Retrieving the temperature via HTTP

<http://sonoff/cm?user=<USER>&password=<PASS>&cmd=status%2010>

Output:

```
{
  StatusSNS: {
    Time: "2018-06-14T07:34:49",
    DS18B20: {
      Temperature: 21.8
    },
    TempUnit: "C"
  }
}
```

## Integrating with MQTT

## Sonoff Basic Module

### Sonoff98

MQTT parameters	
<b>Host ( )</b>	<input type="text" value="192.168.1.60"/>
<b>Port (1883)</b>	<input type="text" value="1883"/>
<b>Client (DVES_79DDCC)</b>	<input type="text" value="sonoff98"/>
<b>User (DVES_USER)</b>	<input type="text" value="sonoff98"/>
<b>Password</b>	<input type="password" value="....."/>
<b>Topic = %topic% (sonoff)</b>	<input type="text" value="sonoff98"/>
<b>Full Topic (%prefix%/ %topic%/)</b>	<input type="text" value="%prefix%/ %topic%/"/>
<input type="button" value="Save"/>	

The temperature information will be published to the

`tele/<SONOFFDEVICE>/SENSOR`

```
{ "Time": "2018-06-14T07:56:34", "DS18B20": { "Temperature": 21.9 }, "TempUnit": "C" }
```

Setting interval at which the sonoff will report its status

Display current interval

> TelePeriod

Set interval

> TelePeriod <seconds>

## Integrating with Homebridge

Install the mqtt-temperature-tasmota homebridge plugin.

> npm install -g homebridge-mqtt-temperature-tasmota

Configure the plugin in homebridge's config.json file:

```
{
    "accessory": "mqtt-temperature-tasmota",
    "name": "sonoff98",
    "url": "mqtt://192.168.1.60",
    "username": "MQTTUSER",
    "password": "MQTTPASS",
    "topic": "tele/sonoff98/SENSOR"
},
```
