

# Gas Leak Detector

## Product description

As the only authorized retailer of this Yeezou Y201 gas detector, we provide expert support with our chemist on staff to answer any technical questions. Buy confidently; this device is covered by EG Air's **lifetime replacement guarantee**. Also included/emailed is a 20+ page eBook on Gas & Air Quality Hazards.

### FIND GAS LEAKS AT HOME:

Find the location of any natural gas, propane, LP or fuel leaks by running sensor probe along a gas pipe, fuel line, or fittings near any gas smells. Pinpoint fuel leaks from your lawnmower or car. Gas leak is found when alarm sounds and LEDs light up. Don't pay a technician's \$100+ diagnostic fee when you can find a gas leak anytime with this propane & natural gas detector.

### STEPS/TIPS ON USE: (see video at <https://www.amazon.com/vdp/17873f5854174d4db2087794a60238be>)

- To detect leaks while minimizing false alarms, turn the sensitivity dial upward toward (+) until the device begins to alarm away from any gas leak. Turn sensitivity dial downward (-) slightly until alarm stops and 1st LED just turns off. Now, any small increase of gas level (as from a leak!) will cause the alarm to sound.
- If alarm sounds prematurely, sensitivity needs to be decreased to prevent false alarms.
- Each leak varies in leak rate and background gas concentration, so adjust sensitivity level to find any leak.
- Allow device to warm up sensor for 10s until yellow "Warm Up" light turns off.

### SPECIFICATIONS:

Maximum Sensitivity: 50 ppm  
Alarm range: 0.1%-40% LEL  
Warm up time: 10s  
Response time: 2s (10% LEL)  
Alarm: Visual with 6 Red LEDs, Audio with Variable Tone Frequency  
Power: 3 AAA batteries

### Package Includes:

- Gas Leak Sniffer
- Manual
- Protective Bag
