LiveStrong Treadmill RS485 Communication

Google Search

From https://www.eevblog.com/forum/beginners/treadmill-motor-controller-interfacing-with-arduino/?PHPSESSID=3mcu5kkmeatp7vb9bjn525v3c4

> *Hey this is an old thread, but I have done exactly the thing you are asking... in fact I found this post while searching for the treadmill controller and wanted to leave some info for the next person:*
> *The comms interface for the controller isn't straight PWM, it uses RS-485. Here is a link to my writeup: https://elliotmade.com/2020/06/26/treadmill-controller-reverse-engineering/*
>
> *I didn't completely reverse the protocol, but I figured out enough to run it. I never found any official documentation (not surprising), but also did not expect to. I left an arduino sketch there as well that can start/stop and control the speed. Couple other notes:*
>
> - *The controller gets mad without the encoder plugged in*
> - *If you don't send it a packet within a few seconds of booting, it also gets mad*
> - *It also requires continuous communication or it will stop (for safety). When stopped or at a steady state, you should continually send the same packet*
> - *The speed commands have to be ramped up. You can't go from 0-4000 in one step, rather you have to send some intermediate speeds as it accelerates (safety?)*
> - *Don't have to ramp down, just send a slower speed and it will coast until it reaches it*
> - *I'm an amateur at such things, so what I did is probably super dangerous... so watch out! (mine is on a belt grinder now, dangerous by design)*
>
> *Cheers*

Arduino Code

```
/*
 * Encoder on A2, A3
 * Button on A1
 * MAX 485: 5v to DE, D8 to DI.  A and B to A and B of the treadmill controller
 * TM1637 display clock on 2, data on 3
 * Short out the middle "safety key" pins
 * Take power from one of the treadmill controller pins (which one?)
 * Treadmill header has 8 pins (left to right, latch at the bottom):
 * 1 - 12v
 * 2 - 12v
 * 3 - A or B?
 * 4 - Safety switch
 * 5 - Safety switch
 * 6 - A or B?
 * 7 - Ground
```

```
 * 8 - Ground
