

Arduino IDE - Adding Board Manager

Instructions

- Start Arduino and open Preferences window.
- Enter https://arduino.esp8266.com/stable/package_esp8266com_index.json into *Additional Board Manager URLs* field. You can add multiple URLs, separating them with commas.
- Open Boards Manager from Tools > Board menu and find esp8266 platform.
- Select the version you need from a drop-down box.
- Click *install* button.
- Don't forget to select your ESP8266 board from Tools > Board menu after installation.

Manually Adding Board Manager

To manually add the board manager for ESP8266 perform the following steps:

```
> cd ~/Documents/Arduino/hardware  
> mkdir esp8266com  
> cd esp8266com  
> git clone https://github.com/esp8266/Arduino.git esp8266  
> cd esp8266
```

Switch to the release tag

```
> git checkout 2.4.2
```

Restart the Arduino IDE
